

## Game

*Games are a great resource.*

*They support talk in maths and, just as important, they motivate us to persevere.*

### Make 10

#### You will need:

- Game board
- A1-6 dice
- Two writing pencils
- Two different coloured pencils

#### How to play

- Play with a partner. Take it in turns to roll the dice and write the number in one of the squares on the Game board.
- You can write two, three or more numbers in a square. You can write numbers in any square, even if there are numbers written in it by the other person.
- If you write a number in a square so that the total of the numbers in that square is now 10, you win that square. Ring it with your coloured pencil.
- The first person to ring three squares in a line, in any direction, wins!

1 3	3	4
2	5	6 2
3		5

Now, which  
number do I want  
to roll to go with  
6 and 2...?

#### Challenge!

- If you are finding this game easy, play **Make 20**.  
You've guessed it, the numbers in a winning square have to add up to 20!
